4-H CAMP SHANKITUNK

ABOUT OUR CAMP:

At 4-H camp you will ...have fun...meet new friends... make things in the craft hall...learn about nature...cook and camp in the outdoors...swim in the camp pool...work in special groups...enjoy evening programs.

4-H Camp Shankitunk is located on 145 acres of county owned land along the west branch of the Delaware River between Delancey & Delhi The main campground is a large open meadow surrounded by naturally wooded hillsides. Campers are housed in cabins spaced among the trees and along the meadow's edge.

Camp is not just a week in the woods. It is what happens to campers, what they take home in their memories, in their new purposes, in their improved and newly acquired skills, in their friendships, in their appreciation of nature and out-of-doors.

PHOTOS:

Each camper unit will be photographed Sunday evening. The 5x7 photographs will be available for sale Friday evening before the closing program.

CAMP STORE:

On Sunday afternoon, during registration, we will offer our usual t-shirts and sweatshirts, as well as other items in our camp store. The camp store will not accept money from campers during the week and costs for crafts and snacks are included in the camp fee, so campers **should not bring money to camp with them.**

IMPORTANT INFORMATION-PLEASE READ, SIGN AND RETURN

Dear Parent/Guardian

This is to inform you about meningococcal disease, a potentially fatal bacterial infection commonly referred to as meningitis, and a new law in New York State. On July 22, 2003, the New York State Public Health Law (NYS PHL) was amended to include section 2167 requiring overnight children's camps to distribute information about meningococcal disease and vaccination to the parents or guardians of all campers. This law became effective on August 15, 2003.

4-H Camp Shankitunk is required to maintain a record of the following for each camper: A response to receipt of meningococcal meningitis disease and vaccine information signed by the camper's parent or guardian; AND information on the availability and cost of meningococcal meningitis vaccine (Menomune TM); AND ONE OF THE FOLLOWING:

- * A record of meningococcal meningitis immunization within the past 10 years; or
- * An acknowledgement of meningococcal meningitis disease risks and refusal of meningococcal meningitis immunization signed by the camper's parent or guardian.

Meningitis is rare. However, when it strikes, its flu-like symptoms make diagnosis difficult. If not treated early, can lead to swelling of the fluid surrounding the brain and spinal column as well as severe and permanent disabilities, such as hearing loss, brain damage, seizures, limb amputation and even death. Cases of meningitis among teens and young adults 15 to 24 years of age have more than doubled since 1991. The disease strikes about 3,000 Americans each year and claims about 300 lives.

A vaccine is available that protects against four types of the bacteria that cause meningitis in the United States – types A, C, Y and W-135. These types account for nearly two thirds of meningitis cases among teens and young adults.

Information about the availability and cost of the vaccine can be obtained from your health care provider and by visiting the manufacturer's web site at www.meningitisvaccine.com. 4-H Camp Shankitunk does not offer meningococcal immunization services.

Please complete the Meningococcal Vaccination Response Form below and return it with the camp health form to 4-H Camp Shankitunk. Note: Per public health law, no institution (camp) should permit any camper to attend the institution in excess of 30 days without complying with this law. The 30-day period may be extended to 60 days if a camper can show a good faith effort to comply.

To learn more about meningitis and the vaccine, please consult with your child's physician. You can also find information about the disease at the New York State Department of Health web site: www.health.state.ny.us and www.cdc.gov/ncidod/dbmd/diseaseinfo.
